

Maintenance paints for painted wooden parts

Preparations

10.6.2015

General principle is, that there will be chosen same type of paint as in original treatment.

- Clean surfaces with brush.
- Wash surfaces with paint remover.
- Wash possible molded surfaces with hypochlorite solution for mould removal.
- Rinse the surfaces carefully with clean water, from above downwards, e.g. with spray.
- Remove old paint.
- Sand clean and dry surface (sandpaper 240-280) and remove sanding dust.
- Follow the instructions for painting conditions, given by paint manufacturer.
